PROFESSIONAL EXPERIENCE

Senior Radio Optimization Engineer

CONVENTOT TELECOM

July, 2016 – Present

Engaged in automation of team's tasks with custom applications based on Javascript. Proactively developing and automating tasks for the entire team in terms of post processing measurement files and importing them in a database (cloud/local). Setting up WAMP/LAMP solution for the purpose of visualization and analysing measurements and network data on map – based on Google Maps API with Javascript. Automating files import process with python scripts.

Senior Radio Optimization Engineer

ERICSSON SPAIN

Feb, 2011 – June, 2016

During my period as an external consultant in Ericsson Spain I was involved and actively participated in the ongoing swap projects for all local operators – Vodafone, Telefonica and newly emerging operator at the time, Yoigo.

Apart from swap projects I was also assigned for a period of one year as on-site support to customer at Vodafone's central, being responsible for tasks preparation and execution, traces logging and down drilling in order to explain and solve different issues;

Radio Optimization Engineer

TELENOR BULGARIA

Aug, 2006 – Jan, 2011

Mobile networks optimisation engineer – responsible for testing services, new features implementation, parameterisation and configuration changes, capacity dimensioning with main target optimal performance of the network.
